HOSHIZAKI AMERICA, INC. ANNOUNCES UPGRADED COMMERCIAL SERIES

Peachtree City, GA (Oct. 2015) – Hoshizaki America, Inc. announces the new stainless steel interior upgrade to our already popular Commercial Series line. Hoshizaki's one, two and three section upright refrigeration units feature dynamic ducted airflow within the all-stainless cabinet construction allowing for optimum air circulation and even temperatures at each shelf level. Use of thermostatic expansion valve (TXV) technology regulates refrigeration flow for faster recovery and efficient operation. The durable Commercial Series utilizes top mount refrigeration, superior insulated walls and door as well as pre-installed stem casters on most of our units – giving you superior refrigeration at a better value. Innovation and advancement of technologies and materials means that we are consistently working to be on the forefront of new and better ways to design our products.

Hoshizaki America, Inc. is the world leader in design, manufacture, and marketing of a wide range of products for the foodservice and healthcare industries as well as business and residential applications. With corporate headquarters in Peachtree City, Georgia and a second manufacturing facility in Griffin, Georgia, Hoshizaki operates some of the most automated production facilities in the business and in 2015 was awarded the ENERGY STAR Partner of the Year – Sustained Excellence for continued leadership in protecting our environment through superior energy efficiency achievements.
